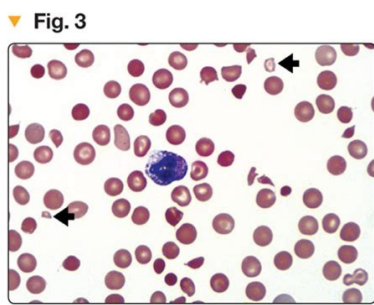

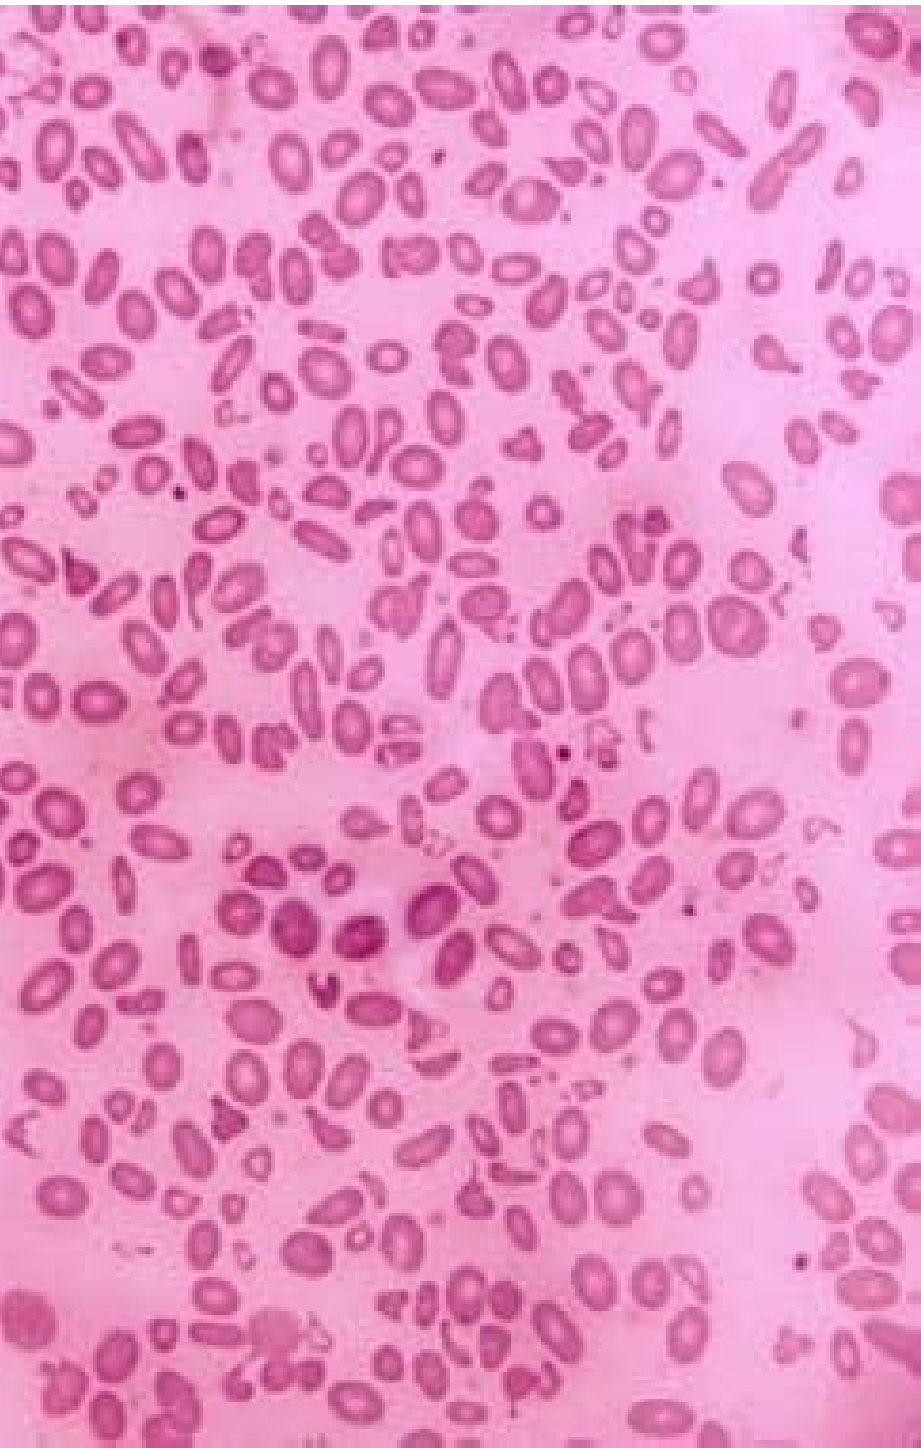

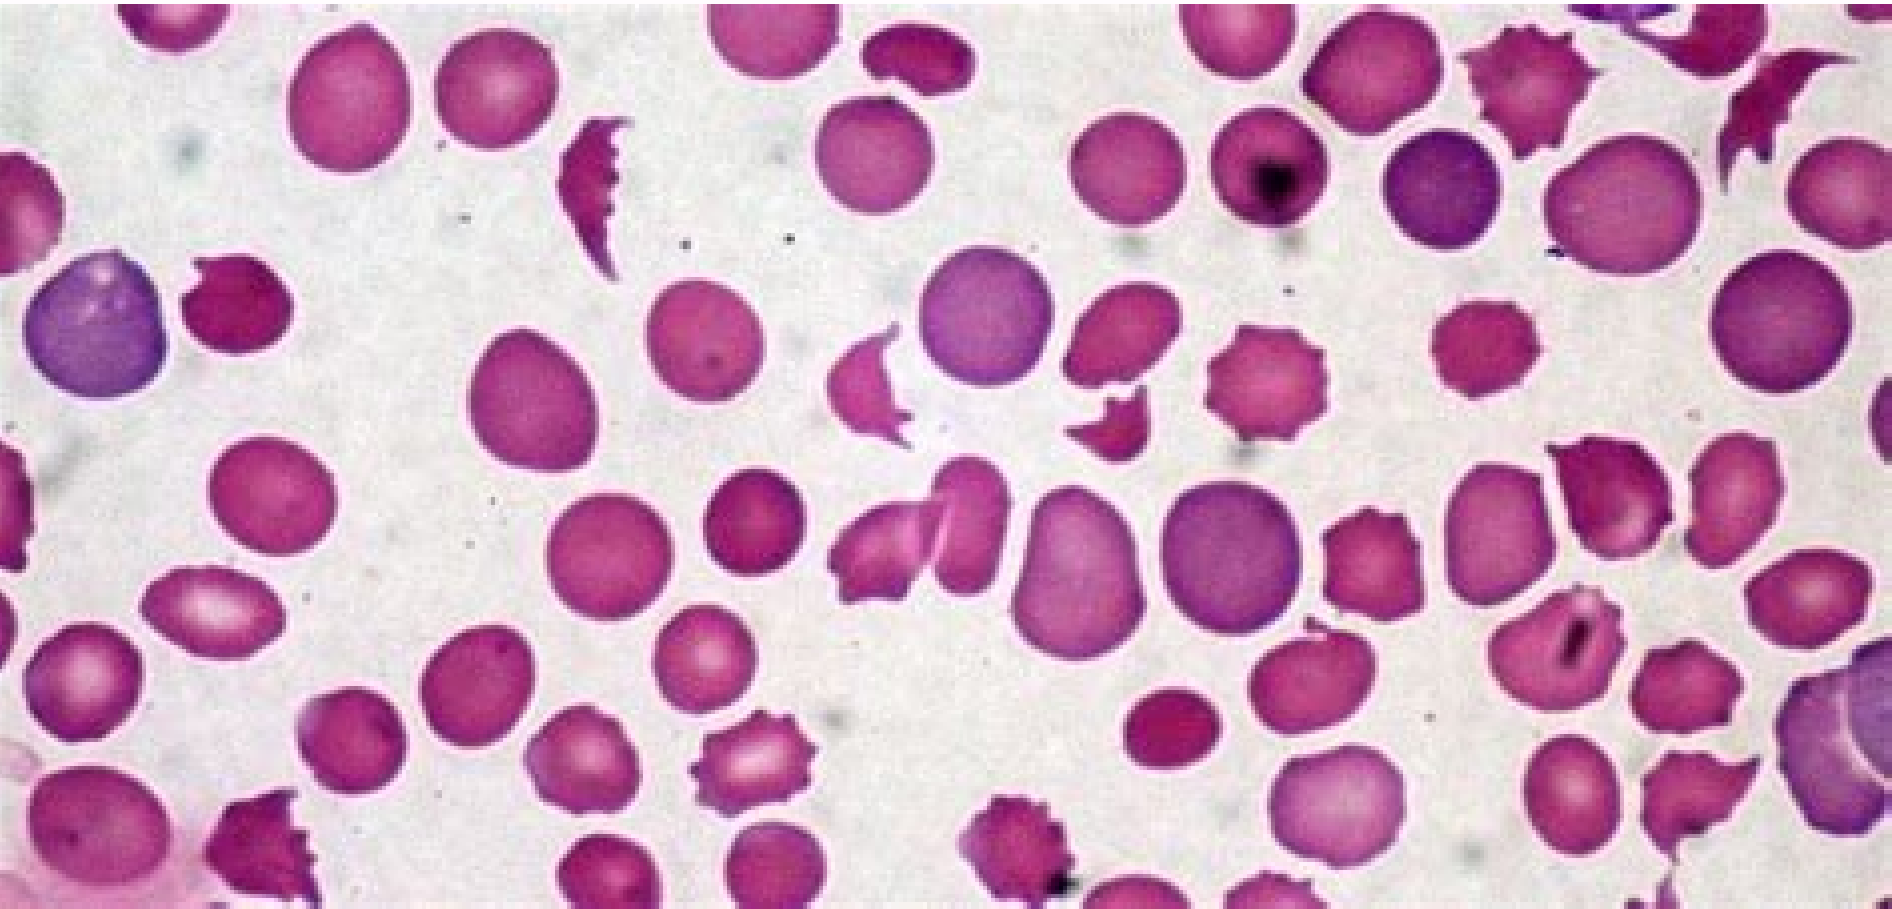

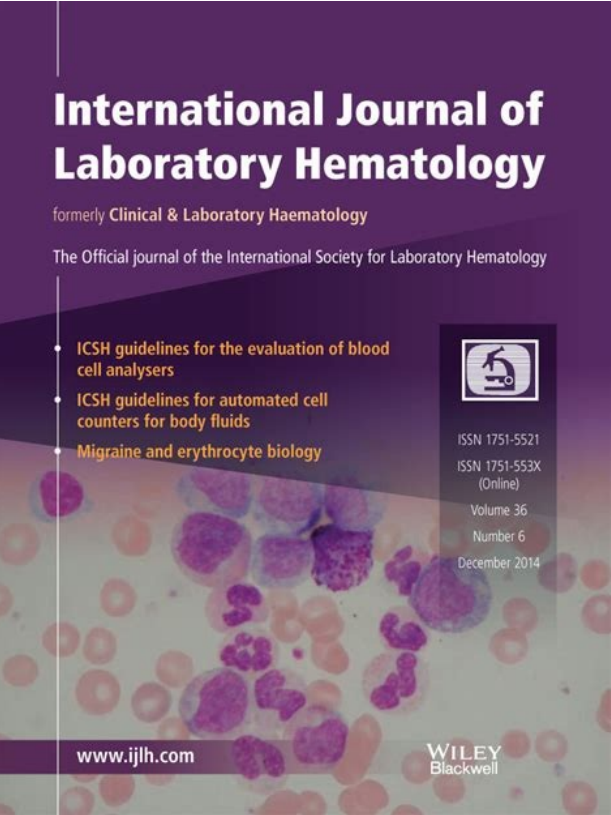

Fig. 3 The peripheral blood smear from a patient with TTP shows increased schistocytes and red cell fragments with central pallor. The recommendations state that schistocytes "usually [stain] darkly, occasionally pale," but do not specifically mention the degree of allowable central pallor.

100 HemoCue® Hb 201 microcuvettes, each individually packaged. See storage and expiration details in the system specifications section above. Only for use with the HemoCue® Hb 201+ or Hb 201 DM Systems. Product Item: 111715 200 HemoCue® Hb 201 microcuvettes (4 vials of 50 ea). Only for use with the HemoCue® Hb 201+ or Hb 201 DM Systems. Product Item: 111716 Set of 5 individually packaged cleaners. Designed for cleaning the optronic unit of the HemoCue® Hb 201 DM Analyzer. Product Item: 139123 4x4 inches. 20 tests per vial, reducing the risk of using expired product. View MSDS here. Product Item: 023000005 R&D Glu/Hgb® is a tri-level control used to monitor the precision and accuracy of HemoCue® Glucose 201, HemoCue® Hb 201+ and HemoCue® Hb 201 DM analyzers. HemoCue is proud to be the U.S. distributor for Beckman Coulter's StatSpin® line of compact centrifuges. Do not reuse. Product Item: 586904 The HemoCue® 201 Primary Docking Station+ connects your Hemocue® Glucose 201 DM Analyzer and/or your Hemocue® Glucose 201 DM Analyzer to patients' electronic health records for full connectivity when used with HemoCue® Basic Connect. Product Item: 139143 The HemoCue® 201 Secondary Docking Station+ connects your Hemocue® Glucose 201 DM Analyzer and/or your Hemocue® Glucose 201 DM Analyzer to patients' electronic health records for full connectivity when used with HemoCue® Basic Connect. Product Item: 139144 6 volt AC adapter & plug for HemoCue DM systems only. Product Item: 201DMADAPT Live customer service and technical support located at HemoCue America in California HemoCue point-of-care hematology tests provide rapid lab-quality patient hemoglobin levels and white blood cell count, so you can go from assessment to treatment in minutes. (350 g), with batteries installed Docking Station Dimensions 8.1x5.3x2.4 in (135x93x61 mm) Weight 1.24 lbs. R&D Glu/Hgb has 105-day closed vial stability with 30-day open vial stability at 15 - 30C (59 - 86F) or at 2 - 8C (35 - 46F) and is provided in 1.5mL plastic dropper vials. View MSDS here. Product Item: GH00N R&D Glu/Hgb is a tri-level control used to monitor the precision and accuracy of HemoCue® Glucose 201, HemoCue® Hb 201+ and HemoCue® Hb 201 DM analyzers. R&D Glu/Hgb has 105-day closed vial stability with 30-day open vial stability at 15 - 30C (59 - 86F) or at 2 - 8C (35 - 46F) and is provided in 1.5mL plastic dropper vials. View MSDS here. Product Item: GH00NX R&D Glu/Hgb is a tri-level control used to monitor the precision and accuracy of HemoCue® Glucose 201, HemoCue® Hb 201+ and HemoCue® Hb 201 DM analyzers. Stable for 18 months from the date of manufacture if stored unopened in the refrigerator at 35-46 °F (2-8 °C). 20 tests per vial, reducing the risk of using expired product. View MSDS here. Material is based on real hemoglobin that offers superior quality with a real hemoglobin formulation that closely mimics whole blood. See storage and expiration details in the system specifications section above. 30-day open vial stability at room temperature. The three levels of control are designed to provide values in the abnormal low, normal, and abnormal high ranges. capacity. Non-woven material, cost-effective to traditional cotton gauze. Superior absorption capacity, low fiber release. Constructed of polyurethane foam sponge, covered by microfiber fabric and pre-saturated with a cleaning solution. 2.2mm incision optimizes sampling technique and increases the chance of obtaining a correct sample value. Product Item: SLN240 Box of 200 sterile safety lancets. 2.8mm incision ideal for finger and heel target areas. (562 g) Temp Ranges Analyzer Storage 32-122°F (0-50°C) Microcuvette Storage 59-86°F (15-30°C) Analyzer Operation 64-86°F (18-30°C) Quality Control Built-in self-test, optional liquid controls Power Cable AC Adapter via docking station Batteries Internal rechargeable batteries Interface HemoCue® Hb 201 DM Primary Docking Station+ and/or HemoCue® Hb 201 DM Secondary Docking Station+ CPT Code 85018-QW The CPT codes provided are based on AMA guidelines and are for informational purposes only. Optimizes sampling technique and increases the chance of obtaining a correct sample value. Product Item: SLN300 Open-vial stability of 30 days at room temperature or refrigerated. View MSDS here. Product Item: 171002002 Open-vial stability of 30 days at room temperature or refrigerated. Docking solution enables connection of up to 5 analyzers. Highly absorbent so you need fewer swabs and sponges. Product Item: 139141 Box of 100 sterile safety lancets. HemoCue Diabetes Systems deliver lab-quality results when your patients need them most - at the time of care. Please direct any questions regarding coding to the payer being billed. Locking lid allows safe transport. Simple to use and with a high level of reliability, these affordable tests are all CLIA-waived. R&D Glu/Hgb has 105-day closed vial stability with 30-day open vial stability at 15 - 30C (59 - 86F) or at 2 - 8C (35 - 46F) and is provided in 1.5mL plastic dropper vials. View MSDS here. Product Item: GH00L R&D Glu/Hgb is a tri-level control used to monitor the precision and accuracy of HemoCue® Glucose 201, HemoCue® Hb 201+ and HemoCue® Hb 201 DM analyzers. Translucent lid for quick visual identification of fill level. Because the control contains erythrocytes, the total test process is verified, including the lysing reagent. Consistent - microcuvette technology features lot-to-lot reproducibility and factory calibration against the ICSH reference method Easy-to-use - touch display, barcode scanner, and automatic transfer of results makes patient management and billing easier Efficient - use primary and secondary docking stations to connect up to five units together via one LAN connector Data Entry - Touch-screen display and built-in barcode scanner Interface Capabilities - Interface with existing network using POCT1-A (CIC standard) with our DMS software. 2.25mm incision optimizes sampling technique and increases the chance of obtaining a correct sample value. Product Item: 130148 Box of 100 sterile safety lancets. Five physiologically relevant levels to validate the entire reportable range. R&D Glu/Hgb has 105-day closed vial stability with 30-day open vial stability at 15 - 30C (59 - 86F) or at 2 - 8C (35 - 46F) and is provided in 1.5mL plastic dropper vials. View MSDS here. Product Item: HCLN13 R&D Glu/Hgb is a tri-level control used to monitor the precision and accuracy of HemoCue® Glucose 201, HemoCue® Hb 201+ and HemoCue® Hb 201 DM analyzers. View MSDS here. Product Item: 171003002 Linearity Verification Material (LVM) for the HemoCue® Hb 201 Systems to validate the entire reportable range. Configurable Functions - Operator ID, Patient ID, Lot ID, Site ID, Patient comments; Critical value alerts; STAT Testing Results Storage - 4,000 patient/STAT tests, 500 QC tests, 500 analyzer logs, 200 patient IDs DMS Software - Patient and QC reports Quality Control Data Management - QC lock-out; QC scheduling; Linearity Reports Principle Modified azidemethemoglobin reaction; dual wavelengths (570 nm and 880 nm) for compensation of turbidity Calibration Factory calibrated against the ICSH reference method; needs no further calibration Testing Sample Material Capillary, venous or arterial whole blood Sample Volume ~10 µL Measuring Time within 60 seconds Measurement Range 0-25.6 g/dL (0-256 g/L, 0-15.9 mmol/L) Device Dimensions 6.70x3.66x1.97 in (170x93x50 mm) Weight 0.77 lbs. CPT coding is the sole responsibility of the billing party. Product Item: SLN200 Box of 100 sterile safety lancets. Comes with power adapter, four (4) rechargeable NiMH AA batteries, connection cable and instructions for use. Product Item: 130662 With interior fitting for HemoCue® Hb 201 analyzer. Product Item: 189011 Interior fitting for Hard Shell Carrying Case; fits two HemoCue® Hb 201 DM analyzers. Product Item: 189021 Made of puncture-resistant polypropylene to meet or exceed industry standards Horizontal drops allow full utilization of capacity to the fill-line. HemoCue is the U.S. distributor for the following Beckman Coulter rapid tests. Product Item: 171001002 Open-vial stability of 30 days at room temperature or refrigerated. Designed with our proven, reliable microcuvette technology, our hematology systems enable easy access to lab-quality results with minimal training and maintenance. A HemoCue representative will be happy to contact you directly to answer your questions about the HemoCue® Hb 201 DM System. R&D Glu/Hgb has 105-day closed vial stability with 30-day open vial stability at 15 - 30C (59 - 86F) or at 2 - 8C (35 - 46F) and is provided in 1.5mL plastic dropper vials. View MSDS here. Product Item: GH00LX R&D Glu/Hgb is a tri-level control used to monitor the precision and accuracy of HemoCue® Glucose 201, HemoCue® Hb 201+ and HemoCue® Hb 201 DM analyzers. R&D Glu/Hgb has 105-day closed vial stability with 30-day open vial stability at 15 - 30C (59 - 86F) or at 2 - 8C (35 - 46F) and is provided in 1.5mL plastic dropper vials. View MSDS here. Product Item: GH00HX The Martel® printer can be used to print results from the HemoCue® Hb 201+ Analyzer, HemoCue® Hb 301 Analyzer, HemoCue® WBC Analyzer and HemoCue® Albumin 201 Analyzer. 1 qt. Success in diagnosing and monitoring of diabetes depends on timely, accurate information. Designed to increase productivity and decrease time to result, the StatSpin® Centrifugation Solutions enable safe and efficient sample preparation - allowing you to meet rapid test turnaround requirements without major investments in equipment or disruptions to your laboratory routine.
