Good luck!Such As Boot From CDrom, Boot From LAN, Boot From USB Device. Login to post I treid going in threw safe mode but it still asked for password. I tried going in as guest but it said account has been disabled.PLEASE. It is surely disabled. And for that Forgotten Password, try to remember that do you have any other user on that laptop. If yes, then log into on behalf of that user and change the password of yours by accessing the User Account Page in the Control Panel. This way you need not have to remember the Password of that account. And if you dont have any other administrator, then try a Hard Reset. You can do it by Deattaching every internal and external Attachable part of the Laptop.Can someone please help.I know that there is a downloadable version which i can do. They are the only people i know who can solve this unless you buy one of eBay etc.Because most Compaqs would put the BIOS in a hidden NONDOS partition on the hard drive, you may have to get an OEM recovery disk for that model. Because there is no BIOS to go to, the machine doesnt know it has a CD, HD or Floppy to go to. Alternative 1. Alternative

2. Find the COMPAQ OEM CD for that model. Since there was no exact model number Click here. <http://thereliablelimo.com/userfiles/casio-2705-manual.xml>
