Amazon calculates a products star ratings based on a machine learned model instead of a raw data average. The model takes into account factors including the age of a rating, whether the ratings are from verified purchasers and factors that establish reviewer trustworthiness. Sorry, we failed to record your vote. Please try again. Freetoair programming is distributed without being encrypted. The initial setup of the CaptiveWorks FTA receiver is a fairly straightforward one. Step 1 Press the

"Power" button on the front of the device to turn the CaptiveWorks receiver off. Step 2 Connect the CaptiveWork FTA receiver to the TV by plugging the RCA connector cord into a digital audio port in the back of the receiver and the other end into the RCA connector port in the TV. The type of cord used depends on the type of TV you have. Step 3 Plug the satellite cord into one of the two "Satellite" jacks on the back of the CaptiveWorks receiver. The display settings screen appears on your TV screen. These settings need to match up with the video capabilities of your TV. Consult your TV manual for the appropriate settings here. Press the "Power" button to turn the receiver off, and then press the "Power" button again to restart the receiver for the settings to take effect. You can also FF and RW in time shift mode. Both RW and FF have a delay to start working about 2 seconds. To return to PLAY from FF or RW press PLAY again. To End Time shifting press STOP then it will return you to live play. 2. To Record Press RECORD button and you will see a popup window that will ask do you want to RECORD CURRENT CHANNEL. If you answer YES then it will start record with a 2 second delay or if you answer NO it will give you a choice to record another channel on same TP, very nice feature, you can record another channel on same TP and watch the one you are on. All this with one tuner, impressive. When Recording starts you will see info bar at bottom giving name of show and time of recording and size of file as well as playtime. You will notice playtime is about 4 seconds behind. If you only want to record for a certain amount of time OTR press RECORD again on the remote it will say OTR 30min press again and will say OTR 60min then OTR 90min then OTR 120min and again OTR OFF When you want to end recording press STOP. 3. To Playback press USB button and it will take you to the USB menus where you could find your recording. Scroll down to recording and press OK. If you press INFO button you can see progress bar. Now you have choices on playback. You can FF different speeds 2x, 4x or 8x, RW you also have the same. To stop FF or RW you need to press PLAY if you press FF or RW button again it advances to the next speed. 4.

Sizes of files save on recording is much better than CW100R. It will record a file as large as 4g and then will start another file. 4g is plenty to record a show or movie or football game 5. To delete recordings of any file on USB drive enter the USB menu and Highlight the file you want to delete and press SAT button and it will confirm you really want to delete it. Say YES and it is gone. 6. Setting timer for recording from EPG is done the same way as in the CW600sp. Find the show you want to record then press the GREEN button you can change the setting RECORD to either ON or OFF and a timer will be setup for you. That is all you need to do. The channels are grouped by transponder. Tune into any channel on the transponder that the EEPG channel is on, and you will receive 7day EPG. Q. How come the guide isn't populating fully. Remember the better the Hard Drive you use the better results for recording. Login to post Corrective Action Corrective Action I need to work usb entrance. Maybe I need software to repair usb entrance, now in my. Where can I purchase one My database indicates the. MFC490 CW is an all-in-one printer. Would not turn on. I replaced the

power board, and now getting a 14blink code. One troubleshooting guide I found says now to replace A board. Any thoughts Warranty gone. So I assume the fuse is fine BUT I am no expert. Second test the power board. The board has an 8 pin cable connector to the main board as follows But from online research I was really expecting that the STB GND to read either 5 V or 3.3 V. So I basically stumped right now as to what is wrong. I would appreciate any help in diagnosing what the next step might be or what is wrong. Do I need to replace the power board or is it something else. The TV has power but obviously does not work so something must be broken. Sorry for being so long winded but I thought the more that I tell you might help. Thanking you all in advance. TV is LG smart Answer questions, earn points and help others.

I think the CW800s user manual is basically the same as the 700s, i would use another remote if not for the fact that the CW700s is one of the most comfortable remotes ive had LOL Thanks! Led light on TV or DVD should stay on, then put code in. Hope it work for you. If you can get a CW600 user manual, the procedure for remote is same. Large images may take a few minutes to appear. Please upload the file as a post attachment instead. United States Members, your posts are welcome here.
