Camera User Guide. If there is a problem with the camera while abroad, please return it to the country of sale before proceeding with a warranty claim to a Canon Customer Support Help Desk. For Canon Customer Support contacts, please see the customer support list supplied with your camera. Chapters 4 onward explain the advanced functions, letting you learn more as you read each chapter. Checking the Package Contents.2 Read This First.3 What Do You Want to Do.4 Conventions Used in this Guide.9 Safety Precautions.10. The latter part of this chapter explains how to shoot and view movies and transfer images to a computer. Compatible Batteries AA size alkaline batteries and Canon AA size NiMH batteries sold separately pp. 38, 40. Can any other batteries be used. We cannot recommend the use of any other batteries than those listed above because performance varies widely. Slide the tab up until you hear a click. Can you check the number of shots that can be taken. You can check the number of shots that can be taken when the camera is in a Shooting mode p. When you push the LCD monitor until you hear the clicking sound, the LCD monitor will automatically turn off, and the image will display in the viewfinder. Since the dates and times recorded into your images are based on these settings, be sure to set them. What if the clock appears when the m button is pressed. The clock will appear if too much time passes between pressing the m button and the n button in Step 2. Formatting initializing a memory card erases all data on the memory card. As you cannot retrieve the erased data, exercise adequate caution before formatting the memory card. To take images that are in focus, be sure to first press the shutter button lightly halfway to focus, then take the shot. Holding the Camera Keep your arms tight against your body while holding the camera firmly by the sides. The camera can also detect and focus on faces, setting the color and brightness to optimal levels.

The display is set to the viewfinder. Press the l button several times to restore the display to the screen. Pressing the l button while turning on the camera power will turn off all sounds except for warning sounds. Especially when there is an orange or blue colored background a wall for example, not be possible to shoot with the appropriate color. If this happens, try shooting in G mode p. Please note that erased images cannot be recovered. Exercise adequate caution before erasing an image. Enter Playback mode. Choose an image to erase. The audio will record in stereo. If you continue shooting for a long time, the camera may become warm. This is not a malfunction. When watching a movie on a computer, frames may drop, it may not play smoothly, and the audio may stop suddenly depending on the computer's capabilities. If you use the supplied software to copy the movie back onto the memory card, you can play back the movie smoothly. System Requirements Windows Windows Vista including Service Pack 1 and 2 Windows XP Service Pack 2, Service Pack 3 Computer model. STE2 Stereo Video Cable STV250N Interface Cable IFC400PCU DIGITAL CAMERA Solution Disk. This product is designed to achieve excellent performance when used with genuine Canon accessories. Shooting You can change the displayed content. Closing the screen turns on the viewfinder. Screen LCD Monitor Playback No Information Simple Information Display Closing the screen turns on the viewfinder. Histogram High Dark Bright Indicators The indicator on the back of the camera and the power lamp p. 43 will light or blink depending on the camera's status. The menu items are organized under tabs, such as for shooting 4 and playback 1. Muting Sounds Adjusting the Volume Display the menu. You can set the brightness of the LCD monitor and viewfinder separately

Press the **l** button to switch to the desired display before making settings. Are there functions that cannot be reset.

As you cannot retrieve the erased data, exercise adequate caution before low level formatting the memory card. Power Saving during Shooting The monitor will turn off approximately 1 minute after the camera is last operated. Attaching the Lens Hood When shooting a wideangle photo that is backlit without using a flash, we recommend attaching Lens Hood LHDC50 to reduce the amount of light entering the lens. All you need do is press the shutter button to take an optimized picture. Shooting in Special Scenes The camera will select the necessary settings for the conditions in which you wish to shoot when you choose the matching mode. Shooting in Special Scenes Choose a Shooting mode. Digital TeleConverter The focal length of the lens can be increased by an equivalent of 1.5x or 2.0x. Once inserted, however, they cannot be deleted. The camera will activate approximately 10 seconds after the shutter button is pressed. You can change the delay time and number of shots p. 78. Press the **p** button. Even if your face is not detected after joining the subjects, the shutter will release approximately 30 seconds later. AE stands for Auto Exposure. What if the shutter speed and aperture value are displayed in orange. If a correct exposure cannot be obtained when pressing the shutter button halfway, the shutter speed and aperture value are shown in orange. Changing the Compression Ratio Image Quality You can choose from the following two levels of compression ratio image quality Fine, Choose the recording pixels. Fine weather conditions, outdoor shooting. Auto Automatically sets the optimal white balance for the shooting conditions. Day Light Fine weather conditions, outdoor shooting Cloudy Cloudy, shady, twilight conditions Tungsten Tungsten, bulbtype 3wavelength fluorescent lighting Warmwhite fluorescent, coolwhite fluorescent, warmwhitetype. My Colors Off Vivid Neutral Sepia Positive Film Lighter Skin Tone Darker Skin Tone Vivid Blue Vivid Green Vivid Red Custom Color.

Shooting Using the Two Second SelfTimer You can set the selftimer to a delay of approximately two seconds. What if the display does not magnify. After locking the focus, the focal distance will not change even when you release your finger from the shutter button. Shooting with Servo AF While the shutter button is pressed halfway, the focus and exposure will continue to adjust, allowing you to take pictures of moving subjects without missing a shot. Frame Confirming the number of detected faces Pressing the **l** button will display the number of faces detected by the camera 35 at the most orange main subject's face, white detected face. Evaluative Center Weighted Avg. Spot Linking the Spot AE Point Frame to the AF Frame Choose the Metering mode. The three shots are taken at the same interval as continuous shooting p. AE stands for "Auto Exposure". FE stands for "Flash Exposure". Auto Exposure Bracketing AEB Mode The camera automatically changes the exposure to take three shots at the same interval as continuous shooting p. Shooting with Slow Synchro You can make the main subject, such as people, appear bright by having the camera provide the appropriate illumination with the flash. The camera will set the appropriate aperture value for the shutter speed you set. M stands for "Time value". The camera will set the appropriate shutter speed for the aperture value you set. B stands for "Aperture value". D stands for "Manual". Also, when the overall image is lacking in contrast, the camera will automatically correct the image for a sharper impression when shooting. Redeye correction may be applied to red areas other than red eyes. What are the 1stcurtain and 2ndcurtain. With the 1stcurtain, the flash fires right after the shutter opens. By simply turning the mode dial to shoot. However, the shooting conditions may cause the image to become coarse, or the colors may not come out as expected.

T Color Accent You can choose to retain a single color and change the rest to black and white in a composition. Shooting Stitch Assist Images Large subjects can be split into several shots that can later be merged together using the included software on a computer to create a panoramic image. Recording also stops when the file size reaches 4 GB. Adjusting the recording volume You can manually set the recording volume for shooting movies. Using the Wind Filter Wind Filter

suppresses noise when the wind is strong. However, unnatural sound may result when used to record in locations with no wind. The movie editing panel and the movie editing bar will appear. The latter part explains how to specify images for printing. Searching Images Using the Control Dial Turn the control dial to quickly search images. You can also jump by the shooting date Scroll Display. Viewing Images in Filtered Playback When there are many images on the memory card, you can filter and display them by a specified filter. You can also protect p. 124 or delete p. 127 all images at once while filtered. When you chose in Step 1 on p. 117, if there are only images with the same date, you can only choose one filter. Also, you can only choose images sorted into categories in Filter playback In filter playback Step 2, you can view filtered images with “g Searching. If you keep the qr buttons pressed, you can fast forward through images. Press the l button, and switch to the focus check display p. 46. A white frame will appear where the AF frame or face was when the focus was set. Operation sounds will not play when connected to a highdefinition TV. Turn off the camera and TV. Connect the camera to the TV. Protected images cannot be erased with the camera’s erase function. To erase an image, cancel protection first. Choose the starting image. Since erased images cannot be recovered, exercise adequate caution before erasing. Protected images p. 124 cannot be erased.

Movies with a resolution of cannot be rotated. Easily Add Images to the Print List Print Added Images The following examples use the Canon SELPHY series printers. Please also refer to the Personal Printing Guide. Number of copies to print Choose an image. You can then print all the chosen images at once or take the memory card to a photo developer to order prints. The first part of this chapter explains convenient and commonly used functions. The latter part explains how to change shooting and playback settings to suit your purposes. Setting the Screen ShutOff Time You can adjust the time the screen takes to shut off automatically p. You can turn off this function. Changing Distance Units You can change the distance units that display in the zoom bar p. 24 and the MF indicator p. You can turn off this function. Changing the Image Display Time You can change the length of time the images display directly after shooting. Changing the Way the Image Displays Right After Shooting You can change the way the image displays after shooting. If you press the shutter button halfway and return to the shooting screen from the custom display settings screen, the settings will not be saved. Image stabilization does not work when the camera is held vertically. However, when starting the camera with the viewfinder display, the startup image will not display, and there will be no startup sound. Software Guide Refer to the Any previously registered startup image will be overwritten when registering a new startup image. The index also appears at the end. Open the cover and remove the AA batteries p. Do not unplug the plug and power cord with the camera turned on. This could erase images you have taken or damage the camera. Also, automatic redeye correction is not available. Flash exposure compensation and safety FE can be set when the flash is set to auto exposure.

Canon Flashes Other than Speedlite EX Series Since other flashes fire at full strength, refer to the guide number listed in the flash’s user guide for the optimal aperture values and ISO speeds for the. If the items below do not solve your problem, contact a Canon Customer Support Help Desk as listed on the included customer support list. Power You pressed the power button, but nothing happened. Press the power button to turn the camera off and back on p. 42. If this error message continues to appear, contact your Canon Customer Support Help Desk as there may be a problem with the lens. Sound Options Set the sounds for each camera operation. Format Formats memory card, erasing all data File Numbering. Erase Erases images. Protect Protects images. Rotate Rotates images. My Category Categorizes images. Corrects dark portions and contrast in still iContrast images. RedEye Correction Corrects red eyes in still images. Trimming Trims portions of still images.
