The awning doesn't come with a torsion bar which conventional awnings usually have. Brackets have been specially designed and incorporated onto the end caps. It is suitable for attaching both walls and ceilings, overhangs, soffits without needing any extra ceiling wall brackets. The awning can be opened as much or as little as you like up to the maximum projection. The specially designed elliptical arms are adjustable to enable you to alter the slope of the awning from 5 degrees to a relatively steep tilt of approximately 35 degrees from the horizontal. The aluminium front bar ensures the fabric hangs smoothly. Bracket is incorporated into the awning end caps. Hardwearing waterproof 300 gsm polyester Available in a choice of five colours plain green, ivory, green and white, multi stripe, charcoal. Easy maintenance, easy to clean with sponge and cloth. <https://www.gallery7.com/userfiles/combi-cosmo-stroller-manual.xml>

The new awning is up and looks great. For the price I think it is a great buy. Instructions state that it must be fixed to brick and not the mortar on a wall but the fixing centres are 120mm on each side so where ever you choose you won't be too far away from the mortar on most houses, I would recommend using 16mm raw bolts as the fixings supplied are not the best for this kind of application. All in all a good product and the customer service was great. Fixings centre are for this awning are 2955mm x 120mm. Hope this info helps. It was well packaged too. I can highly recommend Primrose Awnings! Not the easiest to fit, as previous reviews state the bolt centres are approx 120mm so missing the brick mortar courses is difficult. Easy to install but needs two people to hook in on the brackets which again was easy. Awning is so much better than I expected. We would recommend it to anyone. The product arrived after two days and now the tenants at the sheltered scheme are enjoying sitting out in the fresh air under the shade. Bracket and Anchor quantity is wrong printed in the instruction. Thanks for your understanding. Minor issue the fixings weren't the best so we bought new ones. It is all up for an extra 10. I would recommend this Awning. Also recommend you buy new wall fittings. I have complained to the manufacturer and they asked for a video which I supplied immediately but have not had any further correspondence or solutions. When opened fully the awning is at a significant angle. Minor issue the fixings weren't the best so we bought new ones. My son in law put it up with the help of a neighbour, but only due to the length of it. I really don't know how we managed without it. Our patio at the back is far too hot with no protection. The bolts to attach it to the house are very strong which is good as we do get windy weather. It is easy to roll in and out, but the handle has started to squeak as you do so I will need to look into the best solution for that. One small niggle is that it says there is a bubble to allow you to adjust the angle. No bubble exists so my son in law used his own spirit level. A built in one would have been useful. Overall I am thrilled with it. Would definitely recommend. Thank you. Excellent quality and the size is perfect for our garden providing much needed shade. We especially love the fact it's adjustable so we don't have to have it opened to its max size. Speedy delivery and excellent customer service and aftercare. Well done ManoMano we will definitely recommend you. The material is not as thick and heavy as it looks on the photos but it doesn't detract from this being a superb product for the cost. Quickly delivered and fabulous service from the seller. The ordering was easy and the delivery was fast. Easy to put up, I would suggest watching a video on line if you are not sure how to do it. Any with home DIY will be able to fit it. Would I recommend it yes. It's up and doing a good job. Looks very nice we like the stripe material.

One point I should mention is that one arm doesn't go back completely. Otherwise not bad really. Fast delivery. Excellent service and very quick delivery. Really efficient! This popular European style is a great outdoor shade solution for people looking for protection from the sun and rain with minimal effort required. Used above a pool area, a gazebo, over windows, or any other area that requires shade, retractable folding arm awnings are extremely cost effective, versatile, and low maintenance. Types of retractable folding arm awnings Folding arm awnings come in three categories full cassette, semicassette, and standard. A

retractable full cassette folding arm awning completely seals the headbox and bottom bar from sight when it is fully retracted. It is the sleek, architectural design that hides all internal components that has made this a popular choice among homeowners and motorhomes. However, it is the most expensive option. A semicassette folding arm awning forms a semi outer cover when the fixed headbox and the bottom bar integrate together. Unlike the full cassette, a semicassette also has a crossbar that is attached to the arms. This allows more flexibility when placing the mounting brackets. However, the arms and fabric is still visible from the underside, which is a problem if you want it to be completely hidden. A standard folding arm is the cheapest of the three, and does not use any attached cassette headbox. With its simple design, it includes two or more retractable arms, fabric and tube, as well as a crossbar design with bottom bar. Its major drawback is that the fabric and all components are visible when it is completely retracted.

If you are considering shade sails for your deck, patio, balcony or even restaurant, look no further than on eBay. We supply a whole range of retractable folding arm awnings at competitive prices.
